The USPTO will have a patent application published 18 months from the earliest publication date. The USPTO will delay the publication of an invention disclosure made available by other diverse agency under its own "fast-track" program until 60 months from the filing date or 90 days from the date transferred to the agency. This application will be processed for publication 6 months from the filing date, 90 days from the above "Disclosure Date," which would occur unless otherwise provided for. USPTO controls the process of patent publication as follows: minimum of 15 days after
